"A clerk in the interior has done and said a good thing. Contractors who bid for statishery in the departments have a trick of bidding very low upon all articles which do not come into general use, and very high upon the staples. This has the effect of making the average of the bills low, and at the same time affording a large profit. ### COMMERCIAL AND FINANCIAL

THE New York Herald say that ith all the present decline in gold, Wall street is less expectant of an imnediate return to specie payments than when gold took its downward urn from 130 a few weeks ago,

The Public Funds The following table shows the of gold and bonds as compared the same date last year:

The decline in gold of 15% per cent has had the effect of stimulating the prices of currency 6 per cents, which show an advance of 9%: The Government will have purchased fully nisely millions of bonds by the 31st inst. The amount taken by foreign cepitalists during the year has been over \$100,000,000, while domestic investors have purchased in excess of the amounts sold not less than \$15,000,000, therefore, at the commencement of the new year, the amount, of bonds withdrawn from the American markets will be over \$200,000,000. The advance in the gold value of bonds for the year has been fully 14 per cent, and it is due mainly to the efforts of the present administration to reduce the debt with the surpful revenue.
